THE ROW SPLIT: THE REAL PART AT ORDER ONE PROVED, THE ORDERS ABOVE THE ONE BIT

THE DIVISION AT ORDER ONE · THE VALUE IS EXACTLY ITS REAL PART AND ITS UNICORN PART

THE CUT AT ORDER ONE

REAL PART · ORDER AT MOST ONE
the low-order witness

UNICORN PART · ORDER TWO AND ABOVE
the one bit, supplied by the act

The cut at every order
The value is exactly its real part and its unicorn part.
`value_iff_real_and_unicorn` · `whole_iff_real_and_unicorn`

The real part is the low-order witness
At order one the real part is exactly the low-order witness.
`low_witness_is_the_real_part` · `act_gives_low_witness`

No bypass
Given the low-order witness, the value is exactly the unicorn part above order one.
`no_bypass_at_order_one` · `unicorn_is_order_two_and_above`

The unicorn part is load-bearing
At every stage the staged world above order one carries the real part and fails the value.
`unicorn_part_is_load_bearing` · `unicorn_blocked_above_every_order`

Rank is a dimension count
k independent classes over F_2 span exactly 2^k points; fewer fall short.
`rank_is_the_dimension_count` · `fewer_classes_fall_short`

The residue and its seat
Given the one implication, the sentence; the instance seat above order one is inhabited exactly when the unicorn part holds.
`residue_is_the_sentence` · `seat_is_the_unicorn`
