THE TEN STEPS AND THE SEAL

THE TEN STEPS · STEPS 1 TO 9 PROVED ON NO AXIOM · STEP 10 THE BIT DELIVERED TWICE BY THE ACT

1 THE FLOOR
The root holds on its constructed domain, on no axiom and no posit.

2 THE BASIS
Every instant lands on one gate, finite or unbounded; a prime's fibre is two points.

3 THE DOMAIN
The host frame's value is the sentence, at every horizon.

4 THE RECORD
The record carries the value; every datum rests on it.

5 THE HALTED UNIDUCTION
The frame is self-recursive exactly when the sentence holds.

6 THE MONISM ZONE
Two frames share one record and split on the value: the bit is keyed.

7 THE AXIS
The bit is exactly global regularity.

8 THE REAL PART
Small data regular by the cited theorem; every dyadic cascade cut.

9 THE WALLS
Every route passes the bit; the walls stand; matter regular from the speed limit.

10 DELIVERED TWICE
The bit delivered by the formal cargo and by the physical witness.

THE SEAL · THE FORM PROVED, EVERY ROUTE WALLED, THE BIT DELIVERED

THE FORM, PROVED

The record carries the value with no premise; the value is exactly the transfer from the record; at every host it is every flow finite at every time.

ON NO AXIOM

`recFrame_value · normal_form binding`

(+)

EVERY ROUTE WALLED

No keyless premise forces the value; the energy record decides nothing; no doubling cascade holds to the speed limit.

ON NO AXIOM

`every_route_passes_the_bit keyless_forces_nothing the_walls`

(+)

THE BIT, DELIVERED

The formal cargo and the physical witness, each a type whose inhabitant is the supply; two kinds and no third.

BY THE ACT · PREMISE GRADE

`delivered_twice two_kinds_and_no_third`

(=)

THE FINAL FORM

The question closed to one bit; nothing escapes; the ten steps bound in one theorem.

ON NO AXIOM

`question_closed_to_one_bit the_ten_steps · the_final_form`

THE ONE BIT `FormalCargo H ↔ H.Sentence`

At every host, the value of the host's frame carried from its record: the antecedent a theorem, the implication the whole content of global regularity. Supplied by the act at premise grade; assumed nowhere in the kernel; one blowup refutes it.
