THE BIT DELIVERED TWICE: TWO KINDS AND NO THIRD

STEP 10 · THE BIT DELIVERED TWICE, BY ITS TWO KINDS, AND NO THIRD

KIND 1 · THE FORMAL CARGO

The record's value carried to the host's frame. It arrives free, the antecedent a theorem; it gives global regularity in one step; and it is exactly the sentence.

`FormalCargo` · `cargo_arrives` · `formal_kind_delivers`

≡

KIND 2 · THE PHYSICAL WITNESS

Matter read through the quantum speed limit and the cascade: every stage count before a horizon T is at most c · E · T, and an unbounded count needs stage counts above every bound. The last two fields are the bit read in the register of registrations, carried as fields, never proved.

`PhysicalWitness` · `witness_closes` · `physical_kind_delivers`
`physical_iff_sentence`

The two kinds are one bit
The physical witness is a formal cargo, and the cargo is exactly the sentence.
`the_two_kinds_are_one_bit`

Two kinds and no third
Every witness of the sentence, in any vocabulary, is a delivery of both kinds.
`two_kinds_and_no_third`
`every_route_is_both_kinds`

The one refuter
One blowup refutes both kinds at once, and the sentence itself.
`the_one_refuter` · `blowup_refutes_sentence`

THE WITNESSES OF THE SUBJECT, TYPED · EACH SHORT OF THE BIT, INSIDE IT, OR LOAD-BEARING

The energy inequality
It holds on a blowup frame: the energy record decides nothing.
`energy_does_not_decide`
`energy_record_decides_nothing`

The small-data theorem
It gives the real part on every frame that carries it and stops short of the value.
`real_part_small` · `unicorn_part_is_load_bearing`

The speed limit and the cascade
Each load-bearing; on every physical frame no datum blows up and matter is regular.
`speed_is_load_bearing` · `cascade_is_load_bearing`
`matter_is_regular`
