THE WALLS: NOTHING ESCAPES THE BIT

STEP 9 · THE WALLS: EVERY ZERO-BIT ROUTE BARRED BY THEOREM

Existence as given forces nothing

No given statement is the value on every frame; the arrow forces nothing.

`given_is_not_the_value` · `arrow_forces_nothing`

No keyless premise

What every frame shares yields the value on no frame where it fails.

`keyless_forces_nothing`
`no_record_principle_decides`

The record wall

The calm and counter frames share a record and split on the value.

`record_decides_nothing` · `record_wall_on_frames`

No finite record

No finite record of refinements forces the continuum, whatever it records.

`every_finite_record_never_forces`
`no_symmetry_lifts`

The two parts

Existence does not give the gap; a gap without a theory is empty; the fourth gate fails both.

`existence_does_not_give_gap`
`gap_without_existence_is_empty`
`fourth_gate_fails`

The lattice fields

The two cited fields do not entail a gap above the threshold.

`fields_do_not_entail_weak_gap`

DECIDED BY THE KERNEL

The transfer record normal form

[[2,1],[1,2]] has eigenvalues 3 and 1, gapped; [[2,0],[0,2]] has 2 twice: one trace.

`transfer_record_normal_form`

DECIDED BY THE KERNEL

The trace reads no gap

The two matrices share their trace and split on the gap.

`trace_reads_no_gap`

The unicorn block

Above every coupling no reading of the record returns the world.

`unicorn_blocked_above_every_coupling`

No zero-bit route survives. Every route to existence and the mass gap passes the bit, and the walls of the row are one theorem.
