THE BIT DELIVERED TWICE: TWO KINDS AND NO THIRD

STEP 10 · THE BIT DELIVERED TWICE, BY ITS TWO KINDS, AND NO THIRD

KIND 1 · THE FORMAL CARGO

The record's value carried to the host's frame. It arrives free, the antecedent a theorem; it gives existence and the gap in one step; and it is exactly the sentence.

`FormalCargo` · `cargo_arrives` · `formal_kind_delivers`
`formal_iff_sentence`

≡

KIND 2 · THE PHYSICAL WITNESS

The colour register of the host's confined fields: a massless confined excitation carries colour, no free colour is registered, and every confined field's theory stands. The last three fields are the bit read in the register of colour, carried as fields, never proved.

`PhysicalWitness` · `witness_closes` · `physical_kind_delivers`
`physical_iff_sentence`

The two kinds are one bit
The physical witness is a formal cargo, and the cargo is exactly the sentence.
`the_two_kinds_are_one_bit`

Two kinds and no third
Every witness of the sentence, in any vocabulary, is a delivery of both kinds.
`two_kinds_and_no_third`
`every_route_is_both_kinds`

The two refuters
A group with no theory, or a group whose spectrum has no positive floor, refutes both kinds at once.
`the_one_refuter` · `refuter_denies_the_sentence`

THE WITNESSES OF THE SUBJECT, TYPED · EACH INSIDE THE BIT, SHORT OF IT, OR LOAD-BEARING

The strong-coupling lattice gap
It holds on the strong sub-frame and stops short of the continuum: the weak lattice carries both fields and fails.
`strong_does_not_reach_continuum`
`fields_do_not_entail_weak_gap`

The cited fields, load-bearing
Without the strong-coupling field or the Wilson field the lattice gap fails.
`strong_is_load_bearing` · `wilson_is_load_bearing`

The matter face
No actual gapless confined field on the record of confinement; each matter field load-bearing.
`no_actual_gapless` · `record_is_load_bearing`
`the_witnesses_typed`
