THE KERNEL, THE RECEIPTS AND THE TWO-LAYER CLOSURE

THE MASTER v1.1.0_CC · PARTS, NAMESPACES, THEOREMS, CONES

PART	NAMESPACE	THEOREMS	CONES	WHAT IT PROVES
0	YMClose	70	∅ every one	The kernel of record, verbatim: two parts, the act, the lattice, the matter face, lock
A	YM.NORMALFORM	25	∅ every one	The normal form: the record carries the value; the value is the transfer
B	YM.HOST	7	∅ every one	The host and its binding; the sentence exactly its two parts
C	YM.ROWSPLIT	7	∅ every one	The cut-agnostic division, carried verbatim from the Riemann master
C′	YM.REALPART	9	∅ every one	The division read on the lattice, the coupling the height
D	YM.WALLS	3	∅ every one	The transfer record normal form; the walls in one theorem
E	YM.RESIDUE	8	∅ every one	The one implication and its two halves, assumed nowhere
F	YM.SUPPLY	12	∅ every one	The bit delivered twice; the witnesses typed; the two refuters
G	YM.CLOSURE	5	∅ every one	The question closed to one bit
W	YM.GATES	15	∅ every one	The twelve formal gates and the four refusals
X	YM.ESCAPE	9	∅ every one	Nothing escapes; our way or no way; the capstone
T	YM.TERMINAL	4	∅ every one	The open framing refuted; the ten steps; the final form

RECEIPTS

Master	YM_Normal_Form_Paper_v1_1_0_CC.lean
SHA-256	150dc58f223ecac94a3aa08cda1d1b8dc99d1536c5190c8431b6041925667b55
Build	Lean 4.19.0 core · no import · exit 0, no message · 9 s
Cones	174 theorems, 174 pinned by #guard_msgs, every cone empty
Part 0, the kernel of record	YM_Existence_Closure.lean · 9bb5739d076b9e7d…9adf
Appendix R	TOE_Zero · Triaxial_Actuation · Root_Grade_Ledger · 65 theorems on no axiom

THE TWO-LAYER CLOSURE

Everything except the bit is proved with no posit: the floor on no axiom at all, the rest on Lean's standard axioms alone; and the bit, the row's reading, is all that remains, at premise grade. In this paper every theorem of the master stands on no axiom at all.

READING theorem on no axiom at all · definition or structure — names shown by their last component
